All investments entail risks and may result in both profits and losses. 81.39% of retail investor accounts lose money when trading CFDs with this provider. In particular, trading leveraged derivative products such as Foreign Exchange (Forex) and Contracts for Difference (CFDs) carries a high level of risk to your capital. All these derivative products, many of which are leveraged, may not be appropriate for all investors. The effect of leverage is that both gains and losses are magnified. The prices of leveraged derivative products may change to your disadvantage very quickly, it is possible for you to lose more than your invested capital and you may be required to make further payments. It is important that you understand that with investments, your capital is at risk. Past performance is not a guide to future performance.
